

ANTERIOR CERVICAL FIXATION: TECHNIQUES, TRENDS AND COMPLICATIONS

Course Overview

Aesculap's Anterior Cervical Fixation: Techniques, Trends and Complications course is offered to spine surgeons who manage patients with disease and injuries to the cervical spine. In an interactive and engaging learning environment, participants will have an opportunity to:

- Hear didactic presentations from thought leaders in the spine community
- Share and review case studies in an interactive forum
- Receive “hands-on” training by world-renowned spine surgeons using cadaveric models

Course Objectives

Upon completion of this program, participants should:

1. Understand emerging trends in anterior cervical surgery
2. Be aware of new technologies for anterior cervical surgery
3. Be able to perform an Anterior Cervical Discectomy and Fusion (ACDF) procedure
4. Have a basic understanding of Adjacent Level Ossification Disease (ALOD) and other adjacent segment issues

AGENDA

8:00 am	Breakfast/Registration/Welcome
8:15 am	Trends in Anterior Cervical Fixation
