

# Plasmapore®XP Surface Enhancing Technology

Give Bone a Solid Grip

**AESCLAP®**  
Implant Systems

## Body of Evidence

Aesculap Spine

Plasmapore has been implanted with confidence and studied in more than 20 clinical and pre-clinical publications.\*,\*\*+

Plasmapore®XP is the culmination of over 20 years of innovation in spinal technology and more than 30 years of experience with porous titanium surface enhancing technology. In 1986, Aesculap introduced the first Plasmapore titanium surface enhancement on the Bicontact™ hip prosthesis, and later in 1995, Aesculap launched the first Plasmapore®XP spinal fusion implant – ProSpace™. Below details our clinical and pre-clinical experience with this technology:

Year on market:	Total orthopaedic and spine patients studied:	Total Plasmapore®XP surface enhanced devices implanted since launch:
1986	1000+	50,000
